

# Product Rate

Step 1: Go to home page, select Products. Then first menu is Product Type.

Here before going to create any products, first we need to create product type.

## Product Type

Product Type is mainly required to create any product.before creating any product, first will create product type.

To create a product type, enter the product amount and select the product type either 22K, 24K, SA or SOR and finally select and click on create. The following fig shows these option.

**Create Product Rate**

Amount\*

2300

Product Type\*

GOLD 22K

Date\*

10/16/15

✓ Create

 Here All the fields are mandatory say amount, product type and date. You must enter all the details.

Once you create the product type. The data is stored in data table.

The below fig shows the data table. It stores the everyday product type details.

Product Rate Master			
<div>+ ADD - Delete</div>			
Id	Product Type	Amount	Date
