

Category

Step 1: Select Product then go to Category menu.

Category

This menu is used to create a category and save the category type.

Here first create a category, category means types of gold say ear ring, hand ring, nose ring and other category type of gold you can create here.

The following fig shows the create category option.

Create Category

Name*

Once you create a category, it will stored in data table. The below fig shows the all the category type what you created.
